

Diversity, Equity, Inclusion and Belonging at Unispace

Statement of Intent

We believe spaces should *spark brilliance* in people who use them. We are over 800 thinkers, creators, innovators, and explorers across 26 countries worldwide. We are passionate about people and the world around us.

Together as one team, we create experiences that deepen connections, foster a sense of belonging, and propel success for the world's most interesting and impactful companies and organizations.

We celebrate differences and are committed to embedding diversity, equity, inclusion and belonging across all aspects of our business, our culture, and our work. We believe it is a moral and global imperative.

We are humbled by the significant progress of other businesses in our sector and beyond. We are committed to partnering in this effort and driving transformative change.

We're creating an environment where our teams appreciate and welcome differences, and our people feel empowered and celebrated.

We are also committed to working with our clients to exceed their diversity goals. We are particularly focused on growing our Supplier Diversity Program— establishing partnerships with key agencies and organizations across our markets and cultivating relationships to explore how our visions and strategies can align.

We have ambitious aspirations, an energetic team to deliver them, and limitless opportunities for our talented people to exceed their own expectations. We're going to get to work.

— Steve Quick, CEO
